First Joya Crystal Massage workshop to be held at Beauty Expo

Learn how to massage with less strain to your hands at Joya Australia's first hands-on workshop at this year's Sydney International Spa & Beauty Expo on Saturday, August 13 2011.

Joya Crystal Massage is an innovative concept that combines crystal energies and acupressure in handy and effective massage tools.

"I am looking forward to supporting therapists to create greater and deeper results with less effort, while spoiling their clients with an entirely new massage experience that will enhance every treatment menu," said Ellen Bendin, manager of Joya Australia.

Masseurs and beauticians from worldwide practices, spas, wellness centres and salons have been discovering the benefits of the Joya concept with its freely rotating crystal spheres.

One grateful Joya customer explained, "I have been a massage therapist in deep tissue for 20 years and my hands finally went! It was not until I discovered the Joya system that I have been able to return to massage."

During the 1.5-hour hands-on introductory workshop participants will learn:

- How to easily give great body and facial massages with different JOYA tools
- How to work with crystals
- How to use the JOYA Concept to ensure customers return

The workshop is an investment of only \$79, but please remember places are limited.
